Certifications	ISO 22716 GMP · FDA SGS · BSCI · TÜV Rheinland
Specialty MOQ	1,000–3,000 units depending on category

Why Brand Owners Work with CALLA

1. Technical depth in difficult categories Hydrogel sheet masks, bio-collagen absorbable masks, microneedle patches, and AHA foot peel masks are technically demanding to formulate and produce. Most contract manufacturers either don't offer them or offer commodity-grade versions. CALLA built our R&D and production around these categories specifically.

2. True vertical integration R&D, formulation, stability testing, raw material procurement, production, QC, primary and secondary packaging — all under one roof. No subcontracting. This

means tighter timelines, better quality control, and a single accountable point of contact.

3. Documentation-grade compliance Every order ships with full batch documentation: COA, microbial testing, pH/viscosity records. We provide MSDS, GMPC certificates, and CPSR support for EU registration. Brand owners working with regulatory consultants in any major market have everything they need from us.

4. Accessible MOQs 1,000 units for clay/collagen masks, 3,000 units for hydrogel/foot care, 5,000 units for custom formulation. Practical scale for emerging DTC brands and established brands testing new SKUs alike.

Manufacturing Capabilities

In-House R&D

12 formulation scientists with deep expertise in sheet masks, patches, serums, and foot care. Full stability, compatibility, and efficacy testing on-site.

Vertically Integrated Production

8 production lines covering hydrogel casting, liquid filling, sealing, and dry-room patch assembly. All processes happen in one facility — no subcontracting at any stage.

Packaging & Design

In-house screen printing, pouch sealing, and secondary packaging. Structural packaging design support available for custom formats — sachets, pouches, jars, sticks, and gift boxes.

Quality Control

Inline QC at every production stage. Full batch documentation, microbial testing, and pH/viscosity records retained for every order. Pre-shipment inspection available on request.

Product Categories

Featured (full detail at skincraftlab.com)

Hydrogel Sheet Masks — Premium hydrogel carrier with PDRN, EGF, collagen, gold collagen, and multi-peptide variants. Superior adhesion and ingredient delivery vs. non-woven. MOQ 3,000 units.
